August 11th, 2021

Dear Providers:

I am writing to inform you that Chester County Hospital is once again offering SARS-CoV-2 Monoclonal Antibody (SMA) therapy to patients who meet the appropriate clinical criteria. There is no charge for the drug at this time.

In brief, the inclusion and exclusion criteria for therapy are listed below. More comprehensive information can be found on the U.S. Food and Drug Administration (FDA) Emergency Use Authorization (EUA) document.
We tried to keep the process as simple as possible for providers and patients. Generally, the steps are:

1) Patient identified as SMA candidate by provider
2) Provider consents patient for therapy
3) Provider places consult order in PennChart (preferred method)
   OR
   Provider completes and faxes:
   a. Patient demographic sheet
   b. Consent form
   c. Completed order form
      i. Fax number is listed on the order form
4) Patient is reviewed by CCH then contacted directly by our scheduling team
5) Infusions and/or injections are currently administered on Tuesdays and Thursdays (must be administered within 10 days of symptom onset)

The ordering and consent forms are attached to this letter. Please contact me directly with any questions you may have.

Sincerely,

[Signature]
