Outpatient Speech Therapy for Adults

Many adults are affected by speech, language, cognitive, voice and swallowing difficulties.

Chester County Hospital's department of Physical Therapy, Rehabilitation and Sports Medicine offers comprehensive assessments and treatment plans designed to improve deficits and overall quality of life. Our team consists of licensed Speech Language Pathologists specifically trained to provide specialized care to meet the needs of each individual.

Following evaluation, an individual treatment plan will be developed. This may include therapeutic exercises, diet modifications and a home therapy program to promote carryover and maximize recovery.

Swallowing Studies

We also offer outpatient swallowing studies, which are completed jointly by a board-certified Penn Medicine Radiologist and Licensed Speech Pathologist. These studies provide valuable information that assist in the development of an appropriate treatment plan for individuals with dysphagia.

A swallowing study can be scheduled by calling 610.431.5131.

A physician's prescription is necessary for treatment.
